

Letter of Recommendation

GM System Integracja Systemów Inżynierskich Sp. z o.o.

I highly recommend the training services provided by GM System. As a designer who has completed their Solid Edge 3D CAD software training I can confirm that the lessons were completed by the instructor, dr inż. Adam Budzyński, at the highest professional standard.

The training process concerned parametric design for truck bodyworks (CAD 3D/2D automotive project controlled by Excel spreadsheet).

As a native English speaker, the concepts, practices, and theory discussed in class were very well explained in the English language. This clarity allowed us to efficiently use our class time together, and it allowed us to focus on the application of Solid Edge to my specific work.
